

A FLOORING INSTALLATION MILESTONE FOR A LEADING SUPERMARKET CHAIN

THE PROJECT

The 80,000 sq. ft. Gateway ShopRite in Brooklyn, NY

THE CHALLENGE

Install a durable flooring solution that would:

- Be impermeable to bacteria, water and other liquids
- Withstand the daily wear-and-tear of thousands of shopping carts

THE PROCESS

- Worked closely with the client to establish key performance factors for flooring selection
- Conducted fact-finding inspections of prior floor installations to evaluate product claims, efficacy and performance

THE FLOORING SELECTION

- AcryliCon® resinous flooring, because of its superior hygienic qualities, appearance, slip resistance and low maintenance

THE INSTALLATION

- Several different AcryliCon® systems were applied to meet the performance requirements of each store area
- A variety of colors were utilized to define various areas of the store

THE RESULTS

- The Gillespie Group's installation was fast and uneventful, accommodating the aggressive completion schedule
- At 80,000 sq. ft., the ShopRite at Gateway project is the largest AcryliCon® installation in the USA
