

## **A COMPLETE HEALTHY KINDERGARTEN ENVIRONMENT FLOORING PROJECT IN LESS THAN A WEEK**

### THE PROJECT

- The Kennedy School Kindergarten, Roxbury Public School System, Roxbury, NJ

### THE CHALLENGE

Remove and replace an old and failing flooring material Install a flooring solution that

- Is hypoallergenic for a safe and healthy learning environment
- Is durable and requires minimal maintenance and cleaning
- Satisfies the requirements of special-needs children

### THE PROCESS

- Complete the removal and replacement of product on a one-week schedule

### THE FLOORING SELECTION

- nora<sup>®</sup> rubber flooring – An environmentally responsible rubber flooring that is latex-free, contains no PVC or plasticizers, and requires no volatile solvents for installation

### THE INSTALLATION

- Pre-selected nora<sup>®</sup> flooring materials were delivered in two days
- Removal, installation and air-quality certification were completed on schedule

### THE RESULTS

- Relocated students returned to their classroom in a very short time
- The Kennedy School Kindergarten became a place of health, wellness and learning
