

MAJOR MAKEOVER AT ELEMENTARY SCHOOL: FULL FLOORING INSTALLATION OVER SUMMER BREAK

THE PROJECT

- Elizabeth Elementary School, Elizabeth Public School System, Elizabeth, NJ

THE CHALLENGE

Remove and replace worn corridor flooring material during summer vacation

Install a flooring solution that:

- Withstands heavy foot traffic
- Exhibits long-term durability and requires minimal maintenance
- Is aesthetically pleasing, slip-resistant and safe

THE PROCESS

- Complete the removal of existing floor and replacement of product
- Accommodate school's summer class schedule

THE FLOORING SELECTION

- AcryliCon® Flake Flooring System – a 2mm-to-3mm thick flooring that contains decorative flakes within a chemically-bonded coating
- Microban® antimicrobial chemistry in the resin formula fights bacteria
- Similar look to Terrazzo flooring, but at a lower cost, with less required maintenance

THE INSTALLATION

- Safe removal of existing epoxy flooring system and prefilling of cracks
- Pre-selected AcryliCon® flooring materials
- Installation was completed on schedule

THE RESULTS

- Students returned in time for fall classes to see a fresh, modern floor
- Elizabeth Elementary School continued educational excellence with a healthy, safe new look
